S-RPE-CO Rudder Pedal Extension Installation

The Rudder Pedal Extensions are designed for easy installation and removal. The Extensions are extremely strong and will not come off until you want them off. **It is not necessary to remove the aircrafts rudder pedals for this installation.**

Fits All Cessna with this Standard Face.

We'll use these as an example "Ships" Rudder Pedal.

NOTE:
The bottom two screws are Thread Locked and Factory Torqued. It should NOT be Necessary to loosen the bottom screws For Installation.

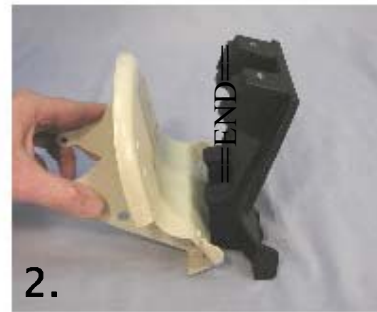

FLIGHT BOSS LTD.

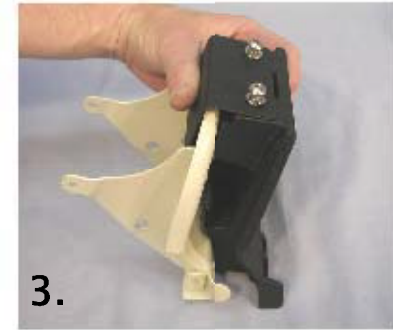

1.

Remove Both Top Screws and Top Clip.

2.

Hook the Lower Clip under the Bottom of the Ships Pedal and lift.

3.

Put Top Clip in place and Insert Screws with lock washers.

4.

Using a 5/32 Allen wrench Tighten Both Top Screws. Be Careful not to over tighten

5.

Locked in Place

6.

Clips are fully engaged.
