- Maximum adhesion and flexibility
- NO primer needed

NEW!
39003
EURO
TRIM
BLACK

- Comfort tip
- Adjustable spray pattern
- Maximum coverage
- Excellent hiding

TRIM PAINT

TRIM PAINTS are formulated to match the OEM finish on automotive exterior trim components. All provide excellent adhesion and flexibility when used on most plastics, steel, aluminum, stainless steel and chrome without the use of primers.

39003 EURO TRIM BLACK is a new addition to the **TRIM PAINT** offering. **39003** is a satin black coating formulated for maximum coverage and matches the color of many of today's foreign model automobiles. In addition, **39003** has a new comfort spray tip that sprays both vertically and horizontally with a spray gun fan pattern.

PREPARATION

Metal and aluminum:

1. Clean surface thoroughly with **38373 SEM SOLVE** or **38381 WORLD CLASS™ SURFACE CLEANER**.

2. Sand with 400 grit sandpaper and re-clean.

Plastic:

1. Clean with **39362 SEM SOAP** and a gray scuff pad. Rinse with water and dry. Repeat if necessary.

2. Clean with **38353 PLASTIC & LEATHER PREP**.

3. To promote adhesion on ABS, PVC and other similar plastics, apply a medium wet coat of **38363 SAND FREE**. Apply color while **38363** is still wet. As the **38363** evapo rates, the color is drawn into the surface creating excellent adhesion. To promote adhesion on TPO, EPDM, PP and other similar thermoplastics, use **39863 PLASTIC ADHESION PROMOTER** or **77723 XXX ADHESION PROMOTER**.

APPLICATION

Aerosol:

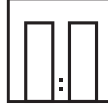

1. Shake 1-2 minutes.

2. **Coats:** 2-3 medium wet
Flash Time: 3-5 minutes

Bulk:

1. Mix 1:1

2. **Air Pressure:** 20-25 psi with non-HVLP
8-10 psi at the cap with HVLP
Coats: 2-3 medium wet
Flash Time: 5-10 minutes
